ON-Demand TRAINING

About Microsoft Official Course On-Demand

MOC On-Demand is an integrated blend of video, text, hands-on labs, and knowledge checks, designed to help IT professionals and developers build their skills on Microsoft technologies. The courses provide a self-paced, stand-alone training alternative for those who prefer to learn at their own convenience. They can also be used in conjunction with instructor-led training to provide a blended classroom experience or be used as a foundation for a training solution that includes mentoring and other learning services.

Any labs associated with courses are delivered on the Microsoft Labs Online (MLO) platform via web browser.

Students launch the labs directly from within the course; no additional set-up is required.

System requirements for MOC On-Demand and Go-To Class

Recommended System Requirements

Operating System:

Windows 10

Browser:

Current version of Internet Explorer, Microsoft Edge, Google Chrome™ or Firefox®

Internet Access:

Broadband Internet connection (more than 256 kilobytes per second per user network bandwidth)

External access to the Internet

Either an Active X control must be installed (requires local administrator permissions), or IE 11 or later

For some corporate firewalls, a proxy client (such as TMG Client) may be required

Screen resolution: 1280 x 1024 or higher

A webcam (Go-To Class)

A headset or microphone and speakers (Go-To Class)

Preferably two screens (Go-To Class)

Go-To Class TRAINING

Bytes People Solutions now offers you the facility to connect into our live instructor-led training courses without the inconvenience of traveling to a training centre.

Live instructor-led training programmes are offered to participants all from the comfort of their own workspace. See and hear the instructor, interact in group discussions and receive immediate assistance. The value of instructor-led training lies in the ability of attendees to interact with the facilitator, view information the instructor is presenting on screen, pose questions, receive assistance when needed and learn from other participants within the same classroom.

Expensive travel costs go hand-in-hand for many organisations wanting to book people on specialised training courses. With the launch of our Go to Class we bring the best of instructor-led training to your computer – wherever you are.

WHAT OUR CUSTOMERS SAY:

"First of all, not having to spend hours in traffic to and from Bytes is a huge advantage, not to mention the fuel as well as wear-and-tear saving on one's vehicle."

"My ADSL line speed was for some reason degraded to 4mb between Monday and Wednesday and Thursday and Friday I worked via a 2mb line."

"There was no lag or any kind of buffering, I was also able to access the LAB's with no issues whatsoever."

"I would strongly recommend remote training to anyone going forward,"

"I enjoyed the online training tremendously. I live in 40kms away, and a trip to Midrand every morning is a daunting thought."

"I really feel that this is taking training to a level of versatility and fitting of the times we live in. Even though I attended from home, I managed to do my labs, and had the facilitator 'remote' on to my machine at home once or twice to help me when I got stuck. Beyond that, even if employers do not want trainees to do the course from home, they could still do the course on site at the office if there were concerns about attendance, or if supervision was required."

"All in all, I would recommend this platform for training, and actually have already done so to my colleagues who are doing the course in August. Many thanks!"
